

My name is Vicki and my last dental appointment was in 1989. In January of 2000 I saw Doctor Sorboro and had oral surgery.

I was so afraid of the pain that I put off going for years. The experience at Doctor Sorboro's office has changed my outlook on dentistry.

I had surgery that lasted several hours and to my surprise the pain was minimal compared to what I thought it would be. My medical doctor had even prescribed valium for me to calm my nerves.

The staff is so supportive and caring and the surgery was not as uncomfortable as I had anticipated.

The follow up after the surgery from Doctor Sorboro and the anesthesiologist who called that night was much appreciated.

I would like all of you to know that I even had a filling done without Novocain. I am now much more comfortable at the dentist's office and even enjoy going in for check ups.

I would like to thank Doctor Sorboro and his staff for the way they made me feel comfortable.

Thank you
Vicki
